Jeffrey,

here is my explanation of what transpired on 6th floor speaker system, Nick explained the following while Scott was helping trouble sho=t the speaker buzz,.

Nick found the (midrange) Synthesis speakers blown on 6th floor, Nic= informed me the Synthesis speakers have two mid's which are only active=when utilizing the Synthesis processor, the other mid's sit dormant when usi=g speakers with normal Dolby 5.1 or 7.2 receiver system, like we are operating now. Nick exchanged the blown Mid's with dormant Midrange spe=kers so system would operate normal, Nick was suppose to order new Midrange speakers for the Synthesis,,just to have speakers in normal condition,.

thank you,
Larry
