barnaby and i were sorry to miss you here!  
thanks for the apartment. it's a great one and scott, your new IT guy =s super fabulous -- he got a wireless network up in this apartment =uickly and easily!

barnaby mentioned the music and the brain you're doing now.  
i've continued to really look into the autonomic nervous system, how to =e-set, relationship to tech issues. turns out, some states are more =uggestible than others. turns out, music can have an impact on ANS =you're probably all over this with your folks).

There's a genius in Chicago -- I don't know him well, have had a couple =f conversations with him when I was really researching email apnea and =he ANS. His name is Stephen Porges. His papers may be of interest to =ou. [stephenporges.com](http://stephenporges.com) Let me know if you want an intro.

xo
