<=>Subject: LSJ

Good morning All,

We have st=rted the work on LSJ. From my initial estimate, it will take 2 full days t= get the cable spliced with the new manhole in place. Once that takes plac= tomorrow we will then test the cable (Hi-Pot test) and then leave the cab=e energized for at least 24 hours. After that period, we will then go thro=gh the steps to put LSJ back on WAPA's Grid.

HH
