Subject: LSJ

Good morning All,

We have started the work on LSJ. From my initial estimat=, it will take 2 full days to get the cable spliced with the new manhole i= place. Once that takes place tomorrow we will then test the cable (Hi-Pot=) and then leave the cable energized for at least 24 hours. After that=period, we will then go through the steps to put LSJ back on WAPA'= Grid.

HH
