Subject: Re: WAPA Update

yes, Friday & Saturday (2 days) Today was a wasted day because the Manhole still had water in it even though Danny said it didn't. It's being pumped out again as we seek

WAPA & Liston can't do anything around water or in water

Bryan's electric guys confirmed 2 days of Splicing & getting the new Manhole in. If the same crew that worked today come back out on Saturday we "might" be able to have WAPA on Monday

Good=orning All,

We have started the work on L=J. From my initial estimate, it will take 2 full days to get the cable spliced with the new manhole in place. Once that takes place tomorrow we will then test the cable (Hi-Pot test) and then leave the cable energized for at least 24 hours. After that period, we will then go through the steps to put L=J back on WAPA's Grid.
