A=ctually, as it turns out, the Somalis have pioneered really quite vigorousl= in recent years in forming highly-active communities-at-sea, ones that su=port extensive entrepreneurial activities great distances from the nearest=shore, moreover over prolonged time-intervals.

</=>

They've even m=de such communities pay -- sometimes remarkably 'handsomely' -- so tha= they've 'naturally' proliferated both quickly and widely!=/u>

</=>

With another hat=on, I've been peripherally involved in detecting the existence-&-loc=tion of – and then 'interacting' with -- such communities, which as=s-class have had utterly remarkable impacts on marine insurance rates in t=e western Indian Ocean! :):(

</=>

Lowell=/u>

PS. Indeed, these d=rt-poor people have innovated remarkably swiftly – and in a highl=-effective manner! Why, they've even attracted significant quantit=es of international venture capital (of a non-too-savory flavor, to be sur=!) to enable their building-out! J

</=>

In the abstract-&-from a great remove, I do admire aspects of their derring-do! [ut then I was able to find a number of features of the Soviet system-of-do=ng-things to likewise admire-out-loud – to the continuing fury-&-des=air of the far-too-many USG security officers assigned to my case... :)])

</=>

PPS. If=you were really-&-truly entrepreneurial, you'll pull-together= a consortium that'd go out and lease a dozen war-surplus deep-sea drill=ng platforms, and deploy them in a line transecting a major marine-shippin= lane in the deep ocean at a 24-mile pitch, i.e., just a shade less than t=ice the internationally-recognized "exclusive control of offshore seas=94 margins of sovereign nations.

</=>

After declaring =themselves to constitute the Sovereign Archipelago of Francis Drake (or per=aps 'Jeffrey Epstein'?), they=could commence to charge tolls on all of the ocean-traffic passing through=their mostly-'offshore' territories...which fees would likely accumula=e quickly to a tidy sum (e.g., one supporting the oh-so-swiftly build-out =ever-more 'islands' of the Archipelago, their proliferation across o=her major sea-lanes, etc.).

</=>

These tolls woul= naturally be priced at just a shade less than the total costs (fuel, time=...) of navigating around the Archipelago's territory. Correspondingl=, I'd recommend emplacement of the initial Archipelago across either =he east-or-west entryway of the Straits of Malacca... titanic 'regrets=92 are involved in avoiding the Straits in making the transit between the =ersian Gulf and East Asia! :)

</=>

Of course, the i=come derived from licensing fishing, etc. in the "exclusive economic zon=s" of 200 mile radius around each such island would be additional...but =hese could be employed to offset the substantial lawyers' bills, "Wash=ngton representation" fees, etc., etc. that would be involved in operati=g such an "instant sovereign!" J [And= to be sure, "The essence of sovereignty lies in its enforcement" – =ut the famous international arms bazaars can instantly outfit-&-staff =he navy of any newbie-among-nations that has a reasonable line-of-credit..=]

Not sure this is about autonomy?<=>

I'm certain this wou=d be better than life in Mogadishu. And probably cheaper...<=>

Think of all the cool =nnovations that would follow –

- 1.=AO Desalination would =e easier and smaller
2. Energy=requirements would be about the same but necessarily renewable</=>
3. Sanitatio= would totally change!
4. =AO Health would matter since livin= in such tight quarters means communicable disease becomes real again (for=everyone!)

</=>

I think it would=be cool to offer this up to Somalia or somewhere desperate and see what ha=pens.

</=>

Rich people don=92t innovate as quickly!!

Some Libertarians tried to create these new community (with autonomous structure, no taxation and even own currency) – Since islands can, under international law, only be claimed if they are at least 30 cm above the high tide point, some have even attempted to build sovereign islands, like real-estate millionaire Michael Oliver's attempt at building a libertarian city-state called the Republic of Minerva in the southern Pacific Ocean. Not sure how anyone could get significant autonomy.

</=>

[http://en.wikipedia.org/wiki/Republic\\_of\\_Minerva](http://en.wikipedia.org/wiki/Republic_of_Minerva) <[http://en.wikipedia.org/wiki/Republic\\_of\\_Minerva](http://en.wikipedia.org/wiki/Republic_of_Minerva)>

</=>

Perhaps it would be better that Peter gives more to HIV!

We are still waiting for his reply re October dinner in NYC

Boris

Peter Thiel's response to urban development. Neat to think about, cool pictures anyway.

\$1.2 million investment into this (sketchy) organization on his part is probably too small to even build one of these but at least he's trying!<=>

What I think would be cool would be to try this in Africa. Even cancer cells stop multiplying when you confine their space. J

Mission: To further the establishment and growth of permanent, autonomous ocean=communities, enabling innovation with new political and social systems.=/u>

<http://www.seasteading.org/>

Floating cities: PayPal billionaire plans to build a whole new libertarian colony off the coast of San Francisco<=span>

- \* Ocean state would have no welfare, no minimum wage, and few restrictions on weapons
- \* Platforms would house 270 people and hundreds could eventually join together

PayPal-founder Peter Thiel was=so inspired by Atlas Shrugged - Ayn Rand's novel about free-market capitalism - that he's trying to make its title a reality.

The Silicon =alley billionaire has funnelled \$1.25million to the Seasteading Institute,=an organisation that aspires to launch a floating colony into internationa= waters, freeing them and like-minded thinkers to live by libertarian idea=s.

Mr Thiel rec=ntly told Details magazine: 'The United States Constitution had things=you could do at the beginning that you couldn't do later. So the quest=on is, can you go back to the beginning of things? How do you start over?&=39;

<=span>

Life on the =cean wave: A design for one of the floating cities which Peter Thiel wants=to start constructing next year off the coast of San Francisco</=span>

Green land: An aerial view =f the city, complete with landscaped gardens. Mr Thiel believes many of the=islands could eventually be joined together

Design for l=ving: This island even has a high-level helicopter pad. The cities would b= constructed on oil-rig like terminals

The floating sovereign nations that=Mr Thiel imagines would be built on oil-rig-like platforms anchored in areas free of regulation, laws, and moral conventions.

The Seasteading Institute says it will 'give people the freedom to choose the government they want instead of being stuck with the government they get'.</=span>

Mr Theil, th= venture capitalist who famously helped Facebook expand beyond the Harvard=campus, called Seasteading an 'open frontier for experimenting with new ideas for government'.

After making=his first investment in the project in 2008, Mr Thiel said: 'Decades f=om now, those looking back at the start of the century will understand tha= Seasteading was an obvious step towards encouraging the development of more efficient, practical public sector models around the world.

'We're=at a fascinating juncture: the nature of government is about to change at = very fundamental level.'

Light city: =eter Thiel called the project, Seasteading, an 'open a frontier for ex=perimenting with new ideas for government'

Mr Thiel said: 'the nature of government is about to change at a very fundamental level'=u>

M= Thiel and his colleagues say their ocean state would have no welfare, loo=er building codes, no minimum wage, and few restrictions on weapons.

Aiming to ha=e tens of millions of residents by 2050, the Seasteading Institute says ar=hitectural plans for a prototype involve a movable, diesel-powered structu=e with room for 270 residents.

The long-ter= plan would be to have dozens and eventually hundreds of the platforms lin=ed together.

Patri Friedman, a former Google engineer who i= working on the project told Details that they hope to launch a flotilla o= offices off the San Francisco coast next year.

'Big ide=s start as weird ideas,' Mr Friedman said.

He predicted t=at full-time settlement will follow in about seven years.=/u>

But while so=e Ayn Rand acolytes may think the idea is brilliant, it's not without =ts critics.

Margaret Crawford, an expert on urban planning an= a professor of architecture at Berkeley, told Details: 'it's a si=ly idea without any urban-planning implications whatsoever.'

Mr Thiel told an audience at the Seasteading Institute Conference in 2009 that: 'There are quite a lot of peop=e who think it's not possible.

'That's a good thing. We don l=;t need to really worry about those people very much, because since they d=n't think it's possible they won't take us very seriously. And=they will not actually try to stop us until it's too late.'=u>
