Subject: 71 table cloth

Do you want this table cloth as one big draping piece, or do you want it fitted to the table like the last photo with a box pleat at the corners? If you get it fitted to the table, then you could have the figures in the design facing the right way on the side panels, versus they would be upside down on the sides if you do it as one big piece.
The cloth is \$190/yd. We would need 23 yards if it's fitted to table, and 18 yards if its one big piece.
