Subject:	why gratitude

just wanted to give you a couple of reasons for my appreciation:

1. you enable me to continue working on my first novel diligently for =he next few years.

2. I can pay $10,400 for a pioneer surgeon who has performed friday a =nique operation on my wife. nancy described her situation:

My Scoliosis damage is nearing a 100%. My spine is fusing. It will not =et better only worse. Very painful.

Choices for me at this point are
1. to do nothing
2, try new therapy

So I am trying core blood with umbilical cells from a healthy mother.

(this is not adult stem cell from my own cells which is not the best. =t is also not amniotic fluid, which is also not the best)

With this therapy, there is no rejection ever, and according to Dr. =uffner it is safe clean effective.

(We are born with trillions of these cells. By the time we are 80 years =ld, they are one in 2 million.)

Umbilical cells have a growth factor. They self replicate and stop =ellular death. They become new cells.

The master cells are just extra cells. They have no other function. =fter injection they will bump up to my own cells and become new cells. = They start to re-build, regenerate going fast and faster.

It takes only a few minutes to inject the cells and results can be seen =n 3 weeks to 3 months as new tissue is growing..

Doctor Duffner follows up for one year after the procedure.

Dr. Duffner calls this a biological revolution. he has given up his =urgical practice and is doing this instead.
He tried it on himself to help the pain in his hands from 33 years of =oing surgeries. He indicated that it worked for him.

Procedure reduces pain [actually each injection caused excruciating pain =nd screaming] so i won't need pain meds.
Expect 50-70 percent =elief in 3 weeks or so.
