Good morning All,

    We have started the w=rk on LSJ. From my initial estimate, it will take 2 full days to get the c=ble spliced with the new manhole in place. Once that takes place tomorrow =e will then test the cable (Hi-Pot test) and then leave the cable energize= for at least 24 hours. After that period, we will then go through the ste=s to put LSJ back on WAPA's Grid.
