I wanted to bring=the old computers here, so I could migrate them to the new machines myself=

• I want to make sure they're se= up right (current software, no adware, excess crap that may have accumula=ed on the older machines).

• The lo=g delays you've seen installing OS updates happened on the 6th flo=r yesterday — I want to make sure I fix that on all the systems.=C2�

• I need to set the machines to bac=up to the new drives we'll have at each location (can't do=that remotely without giving house managers passwords).

• D=ta transfers will need special cables & adapters that the houses don=E2��t have.

Basically, I want to avoid =aving these high powered machines slowed down because they weren't=setup correctly.

Thank you,
