Figuring out:

1. Criteria for projects
2. Advisory board
- =div>3. Right legal structure
4. How much philanthropist should talk to scientist over the website

=b>Any thoughts about all that?

I've talked to a=number of scientists about Satio. I realized that many of them are tremendo=sly depending from universities and hate that.

Liberating scientists from bureaucracies might be a good message for that=.. it's a very long-term goal but feels like a right direction following ge=eral gig economy trend where you less depends on organizations.
=div>

We're already videoshooting some scientists to play with=right format to present their projects.

Got it. Will shape it.

Looking for two types of people right now:

- scientists/projects to fund (really cool and unique and searching for financing). Have a few in pipeline, creating a funnel;

- potential advisors to select and curate best projects (established scientists able to say yes/know on projects sourced).

Attached is more info.

It's really early, lots of things to figure out but I thought you might have some ideas about whom to meet.

Masha
