Wendy is saying that the timber on the property is comprised (see pictures below) The best quote she received for lumber / timber was 6560 with delivery

Please advise

Rich

Here are photos of the beams. They are not as big as the ones that fell and our concern is the cracks/splits could compromise the structure if we use them.

We could possibly try to put lag bolts through them to hold them.

The archway would not be as significant in size and stature.(or strength)

Please let me know how to proceed.

Thank you

Wendy
