HI!

Do you know Peter Thiel?  
<https://www.breakoutlabs.org/> <<https://www.breakoutlabs.org/>>

This is his charitabl= lab effort. Do you think he'd be interested in funding the Harvard wo=k (with me!) on mitochondrial transplant?

Organelle transplant is a=big deal if we can get it right. EVEN if he just gets it right in heart at=acks and strokes = super big deal.

Blood, organs, bone marrow...t=is is next.

McCully has 25 years experience and recently has =roven his proof of concept. Just need a champion. BillG probably not gonna=be that champion.

What do you think?
