Subject: Back to the stains

Hi Jeff

yesterday DSK lawyer went ballistic because i saw DSK. give me a =ing, [REDACTED] and i will tell you his problem. Meanwhile, DSK now =rites me often.

But back to the stains:

"Three of the other stains on the carpet contained the semen and DNA of =hree different unknown males, and one other stain contained amylase =nd a mixture of DNA from three additional unknown individuals. The =tain on the wallpaper contained the semen and DNA of a fourth unknown =ale."

So there are 4 men involved, right, and 3 possible women?

But why would 3 women have a mixture of dna in a single stain?

Cheers
