Jeffrey

am here in Ft Lauderdale until Friday enjoying the company of my 18 year old son—the US Army=has made a man out of him in 3 short months

called a co=ple of times and wanted to wish you a happy new year and thank you for you= warm support

i have solved the problem of Honour=Killings, at least in outline, and i intend to produce a short book while =Iso spreading it on the internet—a film made in Barcelona, trimmed=to less than an hour should arrive when the Spanish get back to work after=Christmas—perhaps mid-January? Your support backed all of th=s

i fly out to Chapman University in Orange Count= LA for a week in April

i was there this November=as a Presidential Fellow—the President is in fact a very agreeable=Italian mathematician of real talent:

Dr. Struppa is the author of more than 200 refereed publications, and he is the editor of several volumes. =e has edited or co-authored more than ten books, including Bicomplex Holomorphic=Functions (=015), (2013), Noncommutative Functional Calculus= Theory and Applications of Slice Hyperholomorphic Functions (2011), Analysis of Dirac Syste=s and Computational Algebra (2004), Fundamentals of Algebraic Microlocal Analysis (1999), and The Fundamental =inciple for Systems of Convolution Equations (1983).

=br>

So he calls me two days before i leave Jamaica and says he h=d watched my whole Honour Killing talk and was taken by its mathematical l=gic and the host of research it invited—exactly how fast do r'= rise as a function of percent cousin marriages? how would clan intercaste=linkage analysis help explain the Hindu case et al

he was eager to discuss with me in April a deeper relationship with Chapm=n including teaching, i.e. a jump from 20 grand a year to 100 or more

so i played your card and said that i was really taken=by Chapman (which I am) and i had a friend who said that if i ever got an =ffer worth considering he would match it (your 80/20 split of 100)

well he liked the sound of that !

so i plan to reverse it with him this April—and have HIM match YO=—50 more in research funds, e.g. to do the genetics of both elite =printers and the West African populations from which they sprang (5 indivi=uals for 5 countries should do the trick) and your funds can't support=that work

this is supposed to be best wishes to y=u and instead it is all about me—but after all i know very little =f your mental life except that its calming influence has left me \$160,000 =icher than a year ago

warmest best

=/div>
bob

p.s. please warn me if i should convert all of my stocks to cash
