Subject: Re:

you are confusing the input and the meaning. => the shape of object O or O' is not defined by the similarity of visual input,

On Mon, Dec 4, 2017 at 4:01 PM, Misha Gromov <mailto:[REDACTED]> wrote:

A difference between direct perception in hearing and vision is that => similarity between objects O and O' is defined by "morphology" i.e by the internal arrangement of sub-units in O and O'

In language similarity between words e.g. cow and ox can not be recovered this way

On Mon, 4 Dec 2017 15:52:31 -0500, jeffrey E. wrote:

no need to know. it works. it takes input and makes a coherent story. (image). it is bounded by frequency. so is sound. why shoudnt the same algorithm (used loosely) , form concepts into understandings. => not sure if the idea is bad or merely my explantion of it

I am not certain we know the much about the higher level vision processing in the brain, but this is where the processing of the language begins

On Mon, 4 Dec 2017 15:46:30 -0500, jeffrey E. wrote:

i dont think many algorithms should be part of the brain.=C2♦ I believe that turning input into a coherent shape is similar in vision hearing and thought. ♦=A0 we know more about vision. edges verticals horiz etc. =C2♦ why not the same for concepts. ideas. . the image = see must be decoded into a whole . the concepts i imagine need the same program. first black and white, shapes , =etc. for vision. as the feedback loop develops.♦=A0 things come into focus. . same with thoughts.=C2♦ . I am still perplexed by how little control we have over the thing we call " I " / i= does most things , it wants , it reacts without "I " input. the signal for repair is not under control =C2♦ , cuts breaks stings. all done by the magician with no way to override it.

Probably, I have to think more, but once you start thinking about how you think you never accept what everybody else think about how you=think.

On Mon, 4 Dec 2017 12:50:01 -0500, jeffrey E. wrote:

see, ? perceive? understand? illusion? a=l but i like the recursive shape space more and more. with closer iterations to what it means to understand. . my model=is comprised of a set function that after recursion comes closer to coherence . but also depends on the subjects algorithm. its very nice.=/div>
