Hi Rich,

I loved the eero on 6 kitchen to the outside of the column, which Merwin thinks the boss is going to hate.

That column is solid stone / concrete and significantly impacting WiFi performance. The printer and AV eeros get 1/2 Signal or worse with it around the corner where it was, and full bars in the new location.

A difference of +30-40 Mbps download speed in the new location.

Here's what it looks like now:

Thank =ou,
