Subject:	Lsj heli pad palm trees

Jeffrey,
I noticed several large coconut palm trees that are 30 feet+ in height on final approach to heli-pad on LSJ, they are north of direct final but pose a potential hazard on night landings. If we must keep them installed at current location, I'd like to illuminate them tremendously or move them further north, you'll see what I mean during landing.

We can view when we arrive LSJ,.

Thx,
Larry
