&nb=p; Hard Facts on China ..

&nb=p; Thought you would be interested in this!</=iv>

China has 19% of the world s populati=n, but consumes ...

53% of the world's cem=nt<=font>

48% of the world's iro= ore

47% of the world's coa=

.... and the majority o= just about every other major commodity.

In 2010, China &=bsp;produced 11 times more steel than the United States .

New World Record:=nbsp; China made and sold 18 million vehicles in

2010.<=ont color="black">

combined.
There are more pigs in=nbsp; China than in the next 43 pork producing nations

In the past 15 years,&=bsp; China has moved from 14th place to 2nd place in
the world in pub=ished scientific research articles.

China=nbsp;now possesses the fastest supercomputer on the entire globe.

<=span>

Chinese people consume=50,000 cigarettes every second

~*~*~*~*~*~

And we think we're sav=ng the planet?! It will not make one iota of difference
what we do in Austr=lia, Canada, the United States or anywhere else in the world; for that matt=r, all the politicians are
doing is increasing our cost of living and makin= our manufacturers uncompetitive in the world market, with their idiotic
ca=bon tax, when countries like china are growing and consuming at these extra=rinary rates! Time to wake up!
