From Heather,
Ref wrapping Veneer led=e.,
I asked them to look closely how Eric did his edge, if t=ey could at least do the large areas

Larry,

I spoke with James and Bo this morning regarding Mr. E=stein's inquiry to wrap the veneer around the bullnose edges on the=Veneer instead of stopping it and using a hardwood. They evaluated ea=h of the ledges, tables and credenza top and determined that due to the design of the furniture and the linear silver bi=ch veneer, they do not recommend wrapping the hardwood in the veneer/single=ply. I have attached photos showing the details of your ledges and th= areas of concern.

Both Bo and James would be happy to further discuss t=e details over the phone should you have any questions.

Kindest Regards,

Heather Lemieux

Good Morning Bo and James,

Please see the email below from Larry Visoski, 5173♦=80♦s Pilot, regarding the hardwood and veneer on the ledges. Are we=able to do this for A/C 5173??

Kindest Regards,

Heather Lemieux

Subject: Veneer

Hello Heather

Could you ask James about how he finishes the bullnose edge on Veneer,,,
=As you see in the photos the light colored wood is a Gulfstream product comp=etion,,
The dark wood is IJI in Islip,,

Mr. Epstein prefers the dark wood edge sample below appearance, where the Ve=ere wraps around the wood,
typically Gulfstream uses a hardwood and stops t=e veneer from wrapping, can you provide the same veneer look as the
Darkwoo= in the photo below using our silver birch

Selection.,
