No. The new fabric is not permeable and the new speakers need to go in the psu panels.

We demo'd a pair from audio international that sounded very good.

We are almost done laying out our recommendation for the entertainment system, but from the audio presentation perspective, we are recommending eight (8) speakers (4 in each psu) and two sub woofers (1 in the aft R/H position as before and one that will be positioned underneath the R/H #1 seat.

Subject: Speaker current location

What material will we use for window line?
Should we keep same location for new speakers?
Thx
Larry
