Jeffrey,

photo below is L/H fwd bulkhead, maybe locate 6x9 speakers in this bulkhead l=ft and right side fwd bulkheads and Foe (Foe) Paint the speaker grill or a=fabric to match the wood for front speaker imagining and clarity?  
also below lower photo shows current speaker location between the window frames at EAR level, since you are utilizing a fabric on these panels we should= get good sound clarity from speakers if we also install new 6x9 speakers in=these locations. the main sound clarity will come from fwd speakers and goo= fill sound would be provided from speakers in side panels. maybe?

thx,,  
Larry
