Jeffrey

attached e mail from Bryan Deshayes, Century Lin=

the e mail outlines current options from Century=Link regarding delivery of service to Zorro Ranch.  
please note O=tion Three

do you wish to wait a few weeks for confirmation of fib=r delivery, or proceed with bundled 8 x T1's from Sandia Crest If you wish to upgrade services right now, T1's and Sandia Crest is =our only option

from conversations with others, there is a very high ch=nce that fiber will be delivered to D mark

in the=interim, the installation of the new phone system could possibly proceed, = will confirm this by tomorrow.  
my advice, would be to wait, but proceed with infrastructure estimates=based on fiber delivery instead of T1's.

for =our consideration

Brice

Brice,

These are our current options:=/u>

1. I can provide 8 T1s with PRI at =HN-75 Sandia Crst, NM within an estimated 2 month timeframe. This would=not require special build out or cost from the customer. Anything more,=such as a DS3, must be a fiber build which will take at least 120 days as well as conduit and =iber build out costs.

2. We provide fiber up to the pedestal=at entrance of Zorro Ranch. This could provide up to Gig speeds, but would require a \$180,000 build out cost from the customer. If the customer=is willing to spend ~\$2500 for a 60 month term, CenturyLink is willing to provide a 6 month credit on the service end.

3. We have potential fiber DSL being placed within 4-6 months in that area. In July, we will know if Zorro Ranch will be a site the DSL will be extended to. This is not a guarantee, but is an option that would not involve the large \$180k build out cost as previously mentioned.=A0

These are our only options right now. I suggest waiting until July to see if we could get fiber DSL as part of a budget for the upcoming projects in your area. Again, there is no guarantee that this will happen, and your site would have to consider option one or two. Please let me know if you have any questions.
