Subject: black and white seat
Attachments: photo.JPG; Untitled attachment 00435.txt

this seat was VERY comfortable, the black side bolster and seat bottom were v=ry snugging, what is interesting, the first layer of foam is very soft, it f=lt like dacron, then gradually went into firmer layers of foam,. soft arm r=st top, felt like dacron again, with firm foam underneath, the seat realy h=gs your torso and legs.
