once you guys give me the plating info. I will call for all in price.

On Thu, Jun 27, 2013 at 9:10 AM, Lvjet <[REDACTED]>

Jeffrey,

Eric noted 246 hours labor, = \$24,600.00

I don't believe he has \$7,500 profit in this project, its much more, just the idea of 246 man hours is hard to comprehend, plus his \$9600 engineering cost seems high. maybe request actually payment for Engineering=cost?

I'm a little confused with Eric, when I first informed him a month=ago that a 12vdc system is best, he flat out told me it was impossible to =nstall a car stereo, now he says its possible, his integrity is in question.

I do like the system he is presenting currently,,
your thoughts on a counter offer?

thx.,

Larry

Subject: Revision 5 (in green)

Jeffrey,

Attached is hopefully the final revision.

Changes made include the entertainment system and the "cancellation" of Option 18.

I can not spend any more time on the entertainment system quoting, so

Estimated labor: =A0 =A0 246 labor hours

Estimated material cost: =A0 =A0 \$10,830

Estimated Engineering and certification cost= \$ 9,500

Estimated profit labor & materials: =A0 \$ 9,438

The reality of entertainment systems is that=there will be labor over runs on the wiring and structural installation th=t will reduce the "estimated" profit margin to what hopefully will be = \$7,500 profit.

I can not be any more honest and transparent=than this. If you have connections that can get my daughter Rachel into=the University of Michigan, then I would happily reduce the cost of the en=ertainment system by \$7,500.
