Thanks for the brief but captivating sushi . =A0 The mathematical modelling book is really great.. I sat up=until 3 am. thoughts . - 1 In your appendix on Graphical and Mathe=atical software, why not think of" life," as the simulation =unning the bio- program. why not , because the algorrithms , time se=ies. approximations and non linear equations are all based in mathematics.=A0 ? I postulate that mathematics represents a desire for a si=gle truth, asymptotically perhaps but ideally, a real truth, ,=Biology is based on - non-truth, deception, deceit, obfuscation , misinfor=ation. NO , i am not nuts . -

grabbing and making use of the others (prey) free- energy , i= an essential biological (i can;t discount purely physical systems =ut thats for a dinner conversation,). imperative. needed and use= as a method of survival. for the agent to protect itself it needs A=ice and Bob like behavior and all its permuations. . protetcion from vi=uses , it might engage the same methods . add junk, encr=pt, have third party verification. etc.

Unfortunately computers don't lie they merely generate som= errors. I want build a computer that will lie to me. (=A0 a female turing machine)
