Not sure that I un=erstand?

The cup holders are always furth=st away from the passenger and the switches are closer to the passenger.

A passenger always has the abili=y to access the switches with a glass occupying the cup holder.<=u>

Jeffrey,</> [REDACTED]

If you are opposed to the switches and cu= holders favoring the inboard side, then I propose that we fabricate a bez=l plate that would incorporate the switches and the cup holders. After =itting, we will have the bezel metal plated to match the switches.<=>

Attached is a bezel that we had made for the global ex=ress arm rest where we incorporated the cup holder and tv arm receptacle i=to one clean look.

Also attached is a 2 page pdf illustrating the propose= bezel detail for the ledges.
