Subject: without a doubt , one of the smartest people i have ever met,

without a doubt , one of the smartest people i =ave ever met,

he is multilingual in the areas =f advanced science. He can conduct a seminar in fields as =iverse as evolutionary biology, computational neuro science. n =imensional manifolds. , or music as a lens into the brain. His =nterests are so far ranging that encompass , signal intelligence, power =aw distributions , and encryption.

I am well aware =hat in his past he has made some awful decisions, and would have done =ifferently if he had the opportunity to do them over. however he =as paid his debt to society, asked his friends and family for =forgiveness and has continued his charitable work that he began decades =go.

i have had the privilege to meet =he worlds greatest minds, and i can easily say that Jeffrey s is =mongst the best of those.

I have =tmost confidence in his integrity. I have dealt with him for a =umber of years on both sides of a negotiation and say with certainty =hat I;d rather be on his side.

He =as been in the Billionaire business for longer than almost anyone else. =nbsp;His insight into the unique problems of the super wealthy , has =een invaluable to many others that i =now

ability with numbers , complex =oncepts. sometimes brutal honesty, refreshing, a =ense of humor that some find highly cultured others find just =utright silly,

HIs homes are probably =he best collection of real estate in the united states. A private =sland , that some describe as a tribute to megalomania. and a ranch in =ew mexico that is truly beyond imagination and my favorite townhouse in =Y. HIs attention to detail is remarkable . I =ind it sad that he doesn't have children of his own, but makes up for =t by maintaining close friendships that have lasted for =ecades.

His chariblae instincts have =een honed over many years and his advice and judgment has been =nvaluable in several instances.

HIs =bility to explain complex derivatives or concepts on the bleeding edge =f science in layman's terms is part of his teaching =ene.

I have met many people who =riticize those who maintain a friendship with Jeffrey, and a group =hose opinions are impervious to change , however, in the vast =ajority of cases , it is with those that have not had the opportunity =o sit with him watch as his mind performs an intellectuall ballet. =nbsp;gracefully moving from one difficult topic and transitioning to =nother seemingly unrelated , only at the end to have the thread pulled =ightly and ending with an elegant coda. =inale.

I can call him and ask , can you =explain this to me, and with an impish respond, and a breath of fresh =ir, if he can't , he simply says I Don't know. =
