I was thinking before the 22nd...</=>

We have not agreed on a solution as yet. The piece of veneer for the ledge I was speaking of was for the CEO seat (R/H #2) that would extend from the aft side of the table lid to the fwd side of the phone door lid.

This would provide us the "real estate" required to reposition the switches and have them fit.

Larry told me this morning that you are not happy if the switches and cup holders are not centered inboard = outboard due to the ledge modification.

I am working on an idea right now with Jay - a stylish detail that we did last year on a Global Express that looked great.
