what can we do to get LSJ up and running . especially movie room

On Mon, Oct 23, 2017 at 8:25 PM, Jermaine Ruan [REDACTED] <mailto:[REDACTED]> wrote:

Good Evening boss

<=r>

LSJ Internet:=/div>

Broadband to install a new radio receiver on LSJ tower and connect to LSJ network to provide island wide internet. Unfortunately, Broadband had internal problems today which has set the installation date back to the 25th. Liston Network is assisting them to get back on track. STT portion is reported as 95% completed they should be finished by tomorrow morning.

GSJ

On hold until LSJ is online and new disco switches arrive to St. Thomas and Hector of VIYA has programmed and installed.

LSJ Theater:

<=iv id="m\_-1361648689703021264AppleMailSignature">James has reviewed the components and the receiver and projector needs upgrading. The 4K is a pseudo setup and will not work with existing components. The Apple TV needs the real deal to work.

Once the new receiver and projector arrive it is just a matter of swap out the old for the new.

Tiki Hut

Audio needs to be redone

<=iv id="m\_-1361648689703021264AppleMailSignature">Flag pole pool

Needs at minimum new speaker connectors to test the system for any line faults

I will continue to review LSJ/GSJ and report any areas that I view as a problem for your approval to be worked on and priority ranking.

</=iv>

FYI

[REDACTED]  
Subject: Re:

Good night Rich

Can we get a new projector also? James found that the existing one will not work (it not true 4K)?

Which estate has the best setup for the 4K and let us duplicate the equipment for LSJ with the current speaker setup in mind.

<=iv id="m\_-1361648689703021264AppleMailSignature">

Everything should be a relative swap out which I should be able to handle with minimal problems.

Regards=C2

This one: Pro-L1505UNL Laser WUXGA 3LCD Projector with 4K Enhancement without Lens?

<https://epson.com/For-Work/Projectors/Large-Venue/Pro-L1505UNL-Laser-WUXGA-3LCD-Projector-with-4K-Enhancement-without-Lens/p/V11H792820> <<https://epson.com/For-Work/Projectors/Large-Venue/Pro-L1505UNL-Laser-WUXGA-3LCD-Projector-with-4K-Enhancement-without-Lens/p/V11H792820>>

That's got a native resolution of 1900x1200 — not 4K at all. They're doing pseudo-4K, which is taking 1080p content and scaling it up. The Apple TV 4K won't play nice with that (it'll act like the existing Apple TV 4 that you have).

Also, the McIntosh MX121AV won't do 4K pass through:

</=iv>

From: [com/brands/product/170-mcintosh-mx121-av-controller](https://apple.com/brands/product/170-mcintosh-mx121-av-controller)  
<<https://apple.com/brands/product/170-mcintosh-mx121-av-controller>>

The MX122 replaces the MX121 model and adds multiple upgrades, including 4K video support with high dynamic range (HDR) passthrough, Bluetooth, more streaming services, Dolby Atmos object-based surround, and upgradability to DTS:X object-based surround and to Auro-3D surround

Good Day James

It is a McIntosh MX121 A/V Control center.

<=div>The projector is a Epson WUXGA Laser Projector with 3D glasses. <=div>

The speaker layout is as follows:

- \* center
- Front Sub
- \* Front Left and Right Surround
- \* Back Left and Right Surround
- \* Back Join Left and Right Sub

The remote is the Universal Model MX980

Ah. Netflix only sends actual 4K through the newest Apple TV (less than a month old). I don't think we can assume what you played was a definitive test.

Please confirm the receiver & cable details when you can.

Thank you,

Good day James

I am hanging in there getting things back to normal. We are taking it one step at a time. I view it as a project to make things better than before.

I will verify make and model for you tomorrow so we can make sure that it is completely compatible. I don't want JE to be dissatisfied because of an oversight. The reviews on this seem to be very good overall.

</=iv>

I remember upgrading the Netflix app and was able to stream some of their "4K" streams pretty well, if there are cabling issues it would not hurt to double check.

[REDACTED] wrote:

Hey Jermaine-

I hope you're well — or at least as well as possible given the storms, aftermath etc.

Do you know which model McIntosh the receiver is? We've got a bunch of non-4K ready boxes at various houses, so if we have one that is good & supports 4K pass through I may want to suggest getting more to match it.

Also, how new are the HDMI cables (both from the Apple TV to the receiver & from the receiver to the projector)? The new 4K Apple TV seems to be really picky about which cables and receivers it works with.
