Subject: Re: FAN's

Jeffrey,

I just spoke to our Rolls Royce Rep, the expert Fan Balance is Rolls Royce Montreal, originally Indianapolis was going to accomplish our Fan balance, after learning they do not have the expertise that Montreal offers. Rolls Royce is checking their schedule for Nov 4th=& 5th for Fan balance in Palm Beach, will have a quote for travel=expense for their mechanics by tomorrow. Since engines are within Rolls Royce / Corporate Care Vib limits, our Max EVM vib is .12 we may be responsible for engine Trimming of Fans. I will have these numbers tomorrow acc=rding to my Rolls Royce Rep (Kathleen). She feels Rolls Royce will cover this under Corporate Care, and we only be responsible for travel/hotel/food. back up plan is Teterboro Nov 6th,. should only take one full day for balance, two days max.

will update you when I have more info,

thanks,
Larry
