thanks, i will take care of your kid. re stereo . control :=A0 i have full access in my mercedes to the control of dvd cd, video. as w=ll as blue tooth source this is the same control in various cheap=stereo equipment. sound : many inexpensive home theatre syst=ms come with microphones to adjust fre and volumne, , it is not m=rely a matter of my liking, it is a matter of flat response. first, =only then i can then adjust for source. . i have no weight restric=ions on system, ie large credneza, two seats out, no mid ra=ge is not a matter of taste.

gaspers. = need alternative solutions. differnt ones, ? new seals , a=ter you played with the one on my seat, it was impossible to control fairly=loud hiss, so it does not seem merely to be the center seal. is it h= fact that the plating was brushed , ?? that allows air leaks?

carpet, ok.

Good morning Jeffrey=

<=span>

Wiring Diagram -<=u>

The e=gineering wiring diagrams go through revision updates, so yes - there was =n update to the drawing on 8/21/13.

Entertainment Audio -

This system has been tuned a f=w times in anticipation of what you personally would like to hear. Yest=rday Dan had the opportunity to speak with you one on one and get a full u=derstanding (bringing back the mid range frequencies). On our drive bac= to Long Island, we spent much of the ride discussing the system and what =ould be required. Dan is confident that he can do so. Yes, you do have =ontrol from your i-Pad or i-Phone for your stored music selections and vid=o which is what we were told you would be using for source equipment. T=e fact that the head unit provides the ability to play a DVD / CD is simpl= a bonus and means for allowing the system to present your stored / mobile=music / video selections. Additionally, you can control certain functio=s through the Cabin Management System control panel at your seat for volum= (up/down) and video selection source (Airshow, Camera, DVD/CD, Apple TV) =s well as speakers (on/off). We will tune the system to bring back the =id range frequencies for a more uniform balance.

LCD Monitor -</=>

The LCD monitor was purchased =y Goodrich - a leading manufacturer in business aviation. I will be speaki=g with Mike McCullum at their facility on Monday morning and expressing yo=r sentiments, including information you have provided in yesterday's e-m=ils so that we may come to a conclusion you find satisfactory. Addition=llly, it was evident that running on aircraft power, we need to install a v=deo isolation filter to clean up the picture quality.=/p>

Air gasper -

most gasper appear to be seal=g air flow +-97% with a few lower than that introducing "noise" into t=e cabin. Now that I have experienced it first hand, I will be speaking =ith my metal plater on Monday morning. Additionally, I will be speaking=with my people internally about how best to resolve this annoying issue.=A0 It appears that although the "cone" within the air gasper does tigh=en snuggly against the cylinder, there is enough air pressure from the sys=em that is able escape through any deviation between the two surfaces meet=ng.

Table Tabs -

Please provide a simple sketch=of the metal tabs you envision to gain easier access to lift the table lid=on the side ledges.

Carpet -

Please have [REDACTED] make s=re she orders about 5 lbs of the same color surging yarn for the carpet an= that she sends us an e-mail of when she anticipates the new blue silk car=et to be delivered.

Thank you,<=p>

Eric
