eric. the entertainment system is extremely probl=matic. extremely !! I reviewed the wiring diagram you sent , from a =lorida firm only drafted the LAST week in august. ??? after ta=eoff, i wanted to advance the awful music on the dvd, LArry told =e there is no way without getting up, walking to the credneza a, =nd change it at the head. this can't be right . you and i had a=firm understanding that this would not happen. control from my seat.=A0 was agreed. in addition The idea that instead of using a fr=qunecy analyzer, and professional sound adjusmtnet tool, readily ava=ible . I had to personally listen to a system that is clearly not=right . made little sense. the antique lcd screen was unwatchable=. as well as the loud hissing from the gaspers at altitude. made this trip=uncomfortable.
