Jeffrey,

I met with my guys at Audio Advisors in PBI, car audio division,. They a=e using the New "Morel Hybrid Integra 402" speaker with Silk dome tweeter for upgrade of Mercedes car speaker s=tems, retail price is \$700.00 a pair, with separate cross=ver per speaker. I have FedEx a pair of Morel 4" round coax speakers to mak= sure they will fit in PSU's in the GIV, do you like this approach so far?<=div>

HYBRID 2-way / Integra

Some proclaim the Hybrid as one of the b=st sounding speaker systems we produce, and the latest generation takes it s=eps closer to perfection. At the heart of the new Hybrid is an unconventional, innovative and highly effective Hybrid magnet system. These Hybrid woofe=s are now paired up with our famed MT230 tweeters and MXR crossovers to del=ver extraordinary sound that's even more pleasing to the ear than b=fore.

The addition of the 2013 CEA Innovation a=ard winning Hybrid Integra expands the installation options of the Hybrid s=ries. Morel's Integra concept minimizes phase error and allows the s=und field to be constant in all directions, making it easy to achieve audio=hile grade performance even when space is limited.

Model	Size & Configuration	Power Handling (Wrms) / Peak Power (W)	89	70-25000	MXR24=
HYBIRD 502	5½" 2-way	120 / 500	90	60-25000	
<=r>HYBIRD 602	6½"=80 2-way	140 / 600	91	50-25000
