Eric and Jay,

</=iv>

The loads affected are as follows:=-/u>

Left Main DC 9.56 Amps Available Currently

Right Main DC 13.58 Amps Available Currently=u>

</=pan>

IF YOU REMOVE THE ADDED 24 to 12vdc Converter=s (Two) 2 Each you will then have:

Left Main DC 9.56 Amps

=ight Main DC 73.58 Amps

The cabin 60hz Converter has no more available power to provide, you have 25 Amps connected to this for LH and RH Outlets and Microwave=Oven.

Thanks,

JIM
