Subject: GIV speaker option??

Jeffrey,

I met with my guys at Audio Advisors in PBI, car audio division,. They are using the New "Morel Hybrid Integra 402" speaker with Silk dome tweeter for upgrade of Mercedes car speaker systems, retail price is \$700.00 a pair, with separate crossover per speaker. I have FedEx a pair of Morel 4" round coax speakers to make sure they will fit in PSU's in the GIV, do you like this approach =o far?

HYBRID 2-way / Integra

Some proclaim the Hybrid as one of the best sounding speaker systems we produce, and the latest generation takes it steps closer to perfection. At the heart of the new Hybrid is an unconventional, innovative and highly effective Hybrid magnet system. These Hybrid speakers are now paired up with our famed MT230 tweeters and MXR crossovers to deliver extraordinary sound that's even more pleasing to the ear than before.

The addition of the 2013 CEA Innovation award winning Hybrid Integra expands the installation options of the Hybrid series. Morel's Integra concept minimizes phase error and allows the sound field to be constant in all directions, making it easy to achieve audiophile grade performance even when space is limited.
