Grr. That receiver doesn'= support 4K pass through either. That means that you can't get 4K v=deo through it.

Thank you,

James Ce

Hey.

We ran into some hiccups getting the 4K Apple TV working in NYC (the receiver doesn't do 4K pass through and the cables have to be upgraded).&=bsp;

How is your movie room's Apple TV connected?  
Is there a receiver between the Apple TV & projector? If so what's the make & model?  
How new are=your HDMI cables?

Thank you,

James Ce
