Jeffrey,,  
Lav water fixed,,  
<=r>

Update from Gulfstream:

Good morning Larry, the technicians found the water servicing handle at the service door n=t fully seated and locked allowing air to vent overboard when the pump/apu w=s running. Seated the valve and all ops checks were good. I will run the AP= again this morning to ensure the system is working properly with both the p=mp and bleed air. I will update you again once final checks are complied wi=h.

Greg

Thx
