Jeffrey

SA= located the Wood veneer you like, its in Stock & placed it on hold.,</=iv> In order for Rusty to provide firm quote, as well as manpower avail=ability for the project.

Gulfstream needs to know exactly wh= wood you want replaced, recently, I told them Drink Ledge., Gulfstream wa=ts to know if that includes the Credenza,. If the Credenza is not included,=how do you end the different types of Wood veneer where they meet?

What veneer is going to be replaced in the Cabin?&nbs=;

Thx
Larry

Hi Larry,

I spoke with Booth Veneers and they do c=rrently have this log available and we have put it on hold for A/C 5173. &n=sp;We are working with Operations to confirm manpower. May I please ask you to send photos of the ledge behind the divan as well a= the ledge at the credenza? I understand you only want to re-veneer t=e ledges and not include the credenza, correct? From the drawing pa=kage and photos (from initial delivery) I am reviewing, the ledge leads into the credenza so we need to address tha= area. The way it is in the drawing package there is not a good start=ng/stopping point for the ledge and credenza without re-engineering these t=o areas. I do understand modifications have been done to the interior from another outfitter so we will need to up=ate drawings.

Looking forward to hearing from you.

Kindest Regards,

Heather Lemieux

Hello Heather
I found the exact wood Veneer my boss would like to install on drink ledges only in 5173.
see attached,
I know it's short notice but is it possible you can locate this woul= in time to just accomplish drink ledges in our
plane during avionics and p=nt install?

Thx
Larry
