Subject:	decentralized prediction markets and order books (w/ bitcoin) & meeting

Jeffrey,
how are you doing?

I just finished this paper and I think it's super interesting: =ttp://weis2014.econinfosec.org/papers/Clark-WEIS2014.pdf

The guy is using the Bitcoin infrastructure to create a decentralized =arket for predictions. Essentially he wrote an 'extension' to bitcoin =hat can be used to trade any type of financial product without a centralized =learing house/entity.

I figured it could be an interesting read for you as well, also as a =ollow up on our discussion a few weeks ago.

Speaking of something different, are you going to be in NYC from July 15 =o July 20? Do you have time for a meeting?

Vincenzo
