SAV located the Wood veneer you like, its in Stock & placed it on hold.,

In order for Rusty to provide firm=quote, as well as manpower availability for the project.

Gulfstream needs to know exactly what wood you want replaced, recently, I told them Drink Ledge., Gulfstream wants to know if that includes the Credenza. If the Credenza is not included, how do you end the different types of wood veneer where they meet?

What veneer is going to be replaced in the Cabin?

Thx

Hi Larry,

I spoke with Booth Veneers and they do currently have this log available and we have put it on hold for A/C 5173. We are working with Operations to confirm manpower. May I please ask you to send photos of the ledge behind the divan as well as the ledge at the credenza? I understand you only want to re-veneer the ledges and not include the credenza, correct? From the drawing package and photos (from initial delivery) I am reviewing, the ledge leads into the credenza so we need to address that area. The way it is in the drawing package there is not a good starting/stopping point for the ledge and credenza without re-engineering these two areas. I do understand modifications have been done to the interior from another outfitter so we will need to update drawings.

Looking forward to hearing from you.<=>

Kindest Regards,=/>p>

Hello Heather

I found the exact wood Veneer my boss would like to install on drink edges only in 5173.  
see attached,

I know it's short notice but is it possible you can locate this wou=d in time to just accomplish  
drink ledges in our plane during avionics and=paint install?

Thx
