Jeffery

Do you approve of=upper No shadow sample with black border?

The gray only may=not be enough contrast for FAA and our FAR125 cert inspections.

=div>

We could use a darker gray for N number or use black pin=outline as in photo.,

Thx

Larry

Subject: N. Numbers

<=blockquote>

Lar=y,

Following our last conversation here is=a set of N numbers, not 12" or the 36" or the three times the size , but
tw=ce the size at 24" high in the military font. Also a flag on both sides. Fl=g is also 24" and a average size.

Please a=vise, Thanks, Guy
