I was discussing with Jermaine a way to make the computer install at flagpol= much nicer.

Do you prefer to have a 5 speaker surround system on the desk?

If not, then B&O makes a nice pair of speakers that goes really well in desi=n with the iMac. And they sound great. Available in black, blue and white. S=e photo enclosed

That would cut down on wires and clutter

We can also get the APC that sits under the desk moved to the room next door=
