Just cal=ed my team on site.

Of course it is the last version or=apple TV, but they can't make any software update until your are l=gged in with your account.

Concerning the network we have tested all the solution.=/div>

When you are connected in WIFI with a computer yo= only have 3 Mb bandwidth (very poor)

When you ar= connected with a cable directly to the rooter you have 9 Mb. To be honest= i am very surprised that your provider can't deliver better speed= In my opinion you should be able to have at least 20 or 30 Mb. Mayb= you should ask your provider if he can do better. Maybe it is just a subs=ription thing.

So if you connect your apple TV in wifi, 3 Mb , terribl= result when watching a movie

We have moved the a=rport in the AV cabinet, and connected the apple TV on the RJ45 port of th= airport. And then we have 9 Mb. (dont really understand why we have bette= results)

So it means that we don't have any loss, be hav= exactly the same result as directly on the router. It means we can♦=99t do anything better.

It is not fantastical for=watching an HD movie, but it works quite good (we tried with trailer, it w=s ok)

So please try to watch a full movie, and tell me how it=works.

In any case, if you can have better bandwi=th from you provider, we should have better results on the airport and on =he apple TV.

Please let me know

Best regard=

Philippe

It is al=ost finished.

Maybe we'll have a few programmin= fine tuning to do later, but it works

Still on site right now.

yes there is an appl= TV connected to the TV connected in WIFI since there is no network cable =n the bedroom (maybe a little bit slow to download HD movies)

best r=gards

any update on completion?

jeffrey wanted to make sure that his master b=droom had an apple tv

please advise

thank you

=div style="word-wrap:break-word"> Dear Jeffrey,

We are currently installation your equipme=t and discover that most of you
video sources are still analogical, and sh=uld really be updated for numerical sources .

We won't have enough analogical input on the receivers if we keep a=l those old
sources.

1 - VHS, no more use of VHS =ape, can we remove it ?

2 - DVD player, very old,=i know that i already asked you the question, but
investing so much for a =ew TV and keeping that old player is a non sens. If you don't want=the expensive multi region
dvd player, can we at least update it for a new=model (non multi region)

3 - sky decoder : very old analogical, can you please a=k your provider for a new
model

4 - Numericalbe d=coder : very old analogical, can you please ask your provider
for a new mo=el (since it is in france, we can handle this)

Thanks for your prompt feedback because we are already =aking the job

Thank you

=hilippe
