Just an idea.....
What do you think?

Dear Dick,

Since January:

- a further US\$ 2 million was injected into the business
- Payer & Provider Solutions are fully functional and are being deployed
- Doctors & Patient Solutions are under development
- Our Knowledge Healthcare Database has grown to 42 databases, the largest of its kind in China
- Sales start now as planned. Revenues this year will be RMB 1 million (US\$ 160k) from first sale to Government, next year planned RMB 10 million (US\$ 1.6 million)
- Partnership Agreement under discussion with one of the largest Chinese healthcare IT Groups for sales large scale product implementation
- JV proposal from WPP (Kantar Health).

I do want to work with you, the best in this field.

I want to work with you directly and not with your investment people who do not understand China nor this business.
I want you to come in for US\$ 5 million for 15% of the Company, common shares pari passu with me.
You get a board seat if you join the board (not your people).

You deal with me and I will never cheat you and will give you my word to try my best to make this a massive success.
We make a straightforward, not complicated legal agreement between us. Jeffrey will review and assure us both it is fair.

My point is: you are always my preferred partner and I trust your judgement and expertise. I want you with me in this company that I built.

All the best

David
