Subject:	Re: Al Qaeda struggling to keep up in cyber security

Hmm is it me or this doesn't make any sense?

Like, the only reason to develop your own tools without homebrew crypto is e=ther because you're so paranoid about Americans that you think everything i= backdoored (read: you're dumb) or it's "deception"..

In the sense that you release the tools as a decoy and possibly as a malware=tool to infect people who want to look into sources&methods of your organiz=tion.

At the end of the day, the best thing you can do is to adopt the tools every=ne else uses and that are realistically not backdoored (eg: red phone) so y=u blend with the crowd.

Am I missing anything?

OT: google for "achmed the dead terrorist" if you've never seen it - kind of=unrelated but it cracks me up every time
