Hi Tyler and Jeffrey,

this is what I'm working on:

*

    drafting the full article on Seth Lloyd/Quantum Computing-- for Scientific American via Jeffrey w/ hyperlinks throughout the text. If not accepted by SA, then we can use it for another publication w Jeffrey's name in the title.

*

    polishing off the other 3 articles so that they are ready to go.

*

    updating content on all 9 websites.

*

    some press releases to keep boosting websites and the NET site (now on page 6).

I have some other things but above is the priority.

please try to get a url page or profile on Scientific American as a guest editor.
