Jeffrey,

I have been speaking to the design team at Novurania Boats, I have provided photos of Nana and the concept of Nyad boat to Novurania design team engineers Jerry and Chris., I mentioned that Nana is your favorite boat for ride characteristics and performance.

Jerry is working to provide you a rendering so they can price this boat for you.

question:

-The Nyad boat concept has a "D tube" or half tube design, which you may have seen during your Nyad visit, compared to the "Nana" boat which is Full Tube. Novurania also manufactures a smaller Foam side rail for docking protection. It does not provide the stability that full tube hull design as Nana offers.

do you want Full tube, Half tube, or Foam side?

thanks,
Larry
