Jeffrey

I'm working the Plane with Pete now,,

The Test equipment used to accomplish the BUSS sweep will arrive Tuesday fro= Duncan in VanNuy CA,. It's being used Monday,, The G4 is still airworthy and ready to fly if you elect to use it., We only have a DATA indication issue, When #1 IRU Data interruption to #2 FMS occurs, the only thing I lose is dua= operation of the FMS,. Both FMS will operate normal in independent mode.,

Dual Mode operation means: the copilot can select navigation performance (su=h as, we are cleared Direct to a certain Waypoint) , and is transfers to #1=Capt's FMS.,

Just FYI

Thx
Larry
