Hazardous Weather Outlook  
National Weather Service San Juan PR  
=53 AM AST Mon Jul 9 2018

AMZ715-725-VIZ001-002-100900-  
St. Thoma= St. John adjacent Islands-St Croix- Nearshore Atlantic and adjacent Ca=ibbean Coastal Waters-  
453 AM AST Mon Jul 9 2018

This Hazardous =eather Outlook is for the U.S. Virgin Islands and the ADJACENT Coastal =aters.

.Day One...Today and Tonight

.Thunderstorms...There i= a chance of thunderstorms with heavy rainfall and strong gusty winds a=ross the U.S. Virgin Islands.

.Flooding...Heavy rains could lead to=urban and gut flooding.

.Wind...Sustained winds up to 34 mph expect=d across the islands.

Strong gusty winds up to 50 mph are possible.

=br>.Waves...Hazardous seas up to 10 feet with occasionally seas up to 13feet are expected across most of the local waters.

.Rip Currents..=There is a high risk of rip currents for most of the local beaches, exc=pt for beaches along the north coast of Saint Thomas and Saint John.

.Days Two through Seven...Tuesday through Sunday

Moisture assoc=ated to the remnants of Beryl will continue to move across the local ar=a, but gradually diminishing until early Tuesday morning. Once the syst=m moves away from the region, weather and marine conditions are expecte= to improve while a mass of drier air along with some Saharan dust enco=pass the region. The high risk of rip current will downgrade to moderat= early Tuesday morning.

.Spotter information statement...

Wi=espread spotter activation is not anticipated, however individual spott=r are encouraged to report high winds, flooding and rip currents to the=National Weather Service in San Juan.
